

eKEY® Fob 3

Your Smart Phone is the Key

Turn your smartphone into your lockbox key with eKEY Fob 3. The fob converts the Bluetooth® signal generated by your smartphone to an infrared signal that can be received by Supra's standard iBox.

Small, lightweight, and convenient

eKEY Fob 3 is half the size and less than half the weight of the original eKEY fob. Its new shock-resistant design adds durability. Battery life is longer and the two coin cell batteries (included) are easy to replace.

Simply press the button when prompted

eKEY Fob works with the eKEY application on a real estate agent's smartphone to communicate with a standard iBox. Agents simply press the button on the eKEY Fob to power it on when the eKEY application prompts them to do so. eKEY Fob is compatible with smartphones that run the eKEY application on popular iPhone®, Android™ and BlackBerry® models.

Features

- Smaller and lighter than the original eKEY Fob
- Longer battery life
- User-replaceable coin cell batteries
- Batteries are included
- Compatible with all eKEY iPhone®, Android and BlackBerry devices
